

After a successful REMATEC show in Amsterdam we are working on all the new topics which came up during our meeting on this fair.

“New Kit On The Block”

This month our focus was on releasing more transmission overhaul kits. We are glad to announce the availability of:

A-OHK-SWRA – to fit for Honda CVT transmissions SWRA which are mainly used in Honda Fit/Jazz and City. This is Autoline’s first overhaul kit for an application which is used in non-European vehicles.

A-OHK- OBH/OBT – to fit for VW Audi 7-speed DCT transmission OBH and OBT.

The OBH transmission is used in Audi Q3, RS3, TTRS3 and VW Tiguan – all with 4-wheel-drive (quattro / 4Motion). The very similar OBT transmission is used in

VW T5 Transporter with 4-wheel-drive and front wheel drive. As there are three different axle drives available for these transmissions, Autoline is offering the axle drive seal kits separately.

We also updated our overhaul kit:

A-OHK-MINI-CVT– to fit for the CT1, GACVT16Z in the Mini Cooper. Autoline added many more items to this kit. As “cherry on the top”, we were able to find good OE sources to supply us with the components at much better prices. Therefore, we were able to reduce the kit-price considerably, too.

Our focus for now and the future: SUB-KITS

We will offer more sub-kits enabling our clients to carry out repairs in specific areas of the transmissions. This will help to reduce costs, avoid the purchase of

complete overhaul and the waste of unwanted components. In the end a saving of resources and the environment.

For promoting our sub-kits on the REMATEC we invented the A-SUK-HAP-PY. Some visitors said this is Autoline’s best kit ... unfortunately it is not for sale.

A new product range: Overhaul kits for transfer cases, Differentials, Axle Drives, Haldex Clutches

In May and June we started to develop a wide range of components and overhaul kits for transfer cases, differentials, axle drives and Haldex clutches. The range covers Mercedes, BMW, Landrover, VW/Audi applications.

All new and updated products are published on our web page
